*Note: Suburban 2-Stage furnaces requires special Change-over switch (Call Ph# 425-408-3140)

Note: Atwood Hydro Flame 2-Stage furnace **WILL NOT work with this system:

*** Note: These 4 inch duct runs are individual ducts originating at the furnace and 2 inch duct runs do not count

**** Note: In most cases the 6th duct run will have to be added and it is suggested that it be an open duct running in the basement towards the back of the coach extending back 6 to 8 feet.

***** NOTE: Vertical installed Furnaces require that our DH18-37-50 Heater Coil be upgraded with a 200 F degree TOD (Call Ph# 425-408-3140)
